

Press release

Maximum Efficiency: Virtual Credit Cards Now Available in the Edi Expense Tool

Lugano, 18 February 2025: A digital expense solution that is simple, fast, and secure. In collaboration with Edi – Expense Intelligence, Cornercard is offering an efficient and time-saving tool in the field of Business Solutions. This tool simplifies the administrative workload of companies and generates real added value through its wide range of functions. A new feature now allows virtual credit cards from Cornercard to be created in real-time within Edi.

Virtual Credit Cards in Edi: Flexible and Fast

Whether for purchases, online payments, or travel expenses – for the first time in the Swiss market, business partners have now the possibility to generate and manage virtual credit cards directly in real time and on the go using the Edi expense tool. These virtual payment cards enable efficient expense management, as they can be requested with individually set budgets and specific usage purposes, allowing immediate deployment. A built-in approval process ensures that all necessary authorizations are obtained in advance. Additionally, the tool supports users with real-time transaction notifications and reminders for missing receipts.

With Edi, employees can digitally record and submit all expenses in compliance with internal policies, with the support of artificial intelligence. Furthermore, both physical and virtual card transactions, as well as cash expenses, can be centrally managed via Edi, significantly improving oversight and control. The simple management of payment cards and invoices, along with the automatic creation of billing periods, makes Edi a comprehensive expense management solution. Additionally, Edi seamlessly integrates with all major ERP systems, ensuring a smooth end-to-end process.

This innovative and flexible solution sets new standards in expense management for modern businesses.

«The comprehensive solution offered by Edi and Cornercard provides companies with significant added value on multiple levels. On one hand, all expenses can be efficiently managed while ensuring compliance with legal requirements. At the same time, the responsible finance team maintains seamless control over all processes», says Alessandro Seralvo, Head of Cornèr Group Cards Division.

«With the new features developed through the collaboration between Edi and Cornercard, we are revolutionizing travel and expense management across the market. The integration allows travelers and travel managers to manage virtual cards in real time – making travel and expense processing even easier, safer, and more sustainable», confirms Simon Wespi, Head of Consulting at HR Campus AG.

About Cornèr Group/Cornèrcard

Cornèr Group is a private and independent Swiss banking group offering the full range of universal banking services. Founded in 1952 in Lugano, Switzerland's third-largest financial center after Zurich and Geneva, the group provides a broad spectrum of traditional banking services. It has established itself particularly in the fields of private banking, credit financing, credit and prepaid cards (Visa, Mastercard, and Diners Club through Cornèrcard), as well as online trading (Cornèrtrader). These pillars form the foundation for the bank's continued growth and development.

The Cornèr Group consists of its parent company, Cornèr Bank Ltd in Lugano, along with four branches in Chiasso, Geneva, Locarno, and Zurich, as well as subsidiaries including Cornèr Bank (Overseas) Limited, Cornèr Bank Limited Guernsey Branch, Cornèr Europe Ltd and Finpromotion.
