

SCANPROTECT: optimum protection against data misuse.

E-mails, e-banking, online shopping – many things are faster and easier online. However, personal data also falls into the wrong hands more quickly than you think: criminal activities on the Internet range from fraudulent e-mails and unauthorised card usage to cyberbullying, data theft and identity theft.

ScanProtect safeguards you and your family (if you have family coverage) against these risks with extensive benefits.

Prevention with ScanProtect powered by Experian

On the Darknet, stolen data records are a coveted commodity – be it e-mail addresses, access data, ID cards or payment card numbers. ScanProtect Darknet Monitoring offers you a service that combs through the Darknet and warns you when your personal data appears: you are given access to a protection portal, where you can define what should be searched for. Should data be found, a personal message and a recommendation for further action will be sent exclusively to you.

Good to know: If you have protected your payment cards with the Securicard Basic or Plus Service, blocking and reissuing costs are covered.

Support in the event of misuse.

Should your data be misused despite all the precautions – be it through an unauthorised purchase online, data loss due to viruses, the misuse of personal login details or copyright infringement – the extensive benefits of ScanProtect Internet Protection truly prove their worth.
